

# About

## our children's therapy team

# What do we do?

We work in an integrated way and welcome individuals who are innovative and whose ideas can help to develop the services we offer. As part of Medway Community Healthcare, the children's therapy team places an emphasis on social value leading to strong links with the community, eg charity events, disabled sports days, summer picnics, inclusive discos. We encourage staff to take up opportunities for training, support and occasionally research. Our graduate academy will support you and help you to develop as you start your role as a professional.

The team includes speech and language therapists, occupational therapists, physiotherapists – across both neuro and MSK, a continence advisor, podiatrists, dietitians, an early support worker, associate practitioners and of course our fabulous team of administrators to support us.

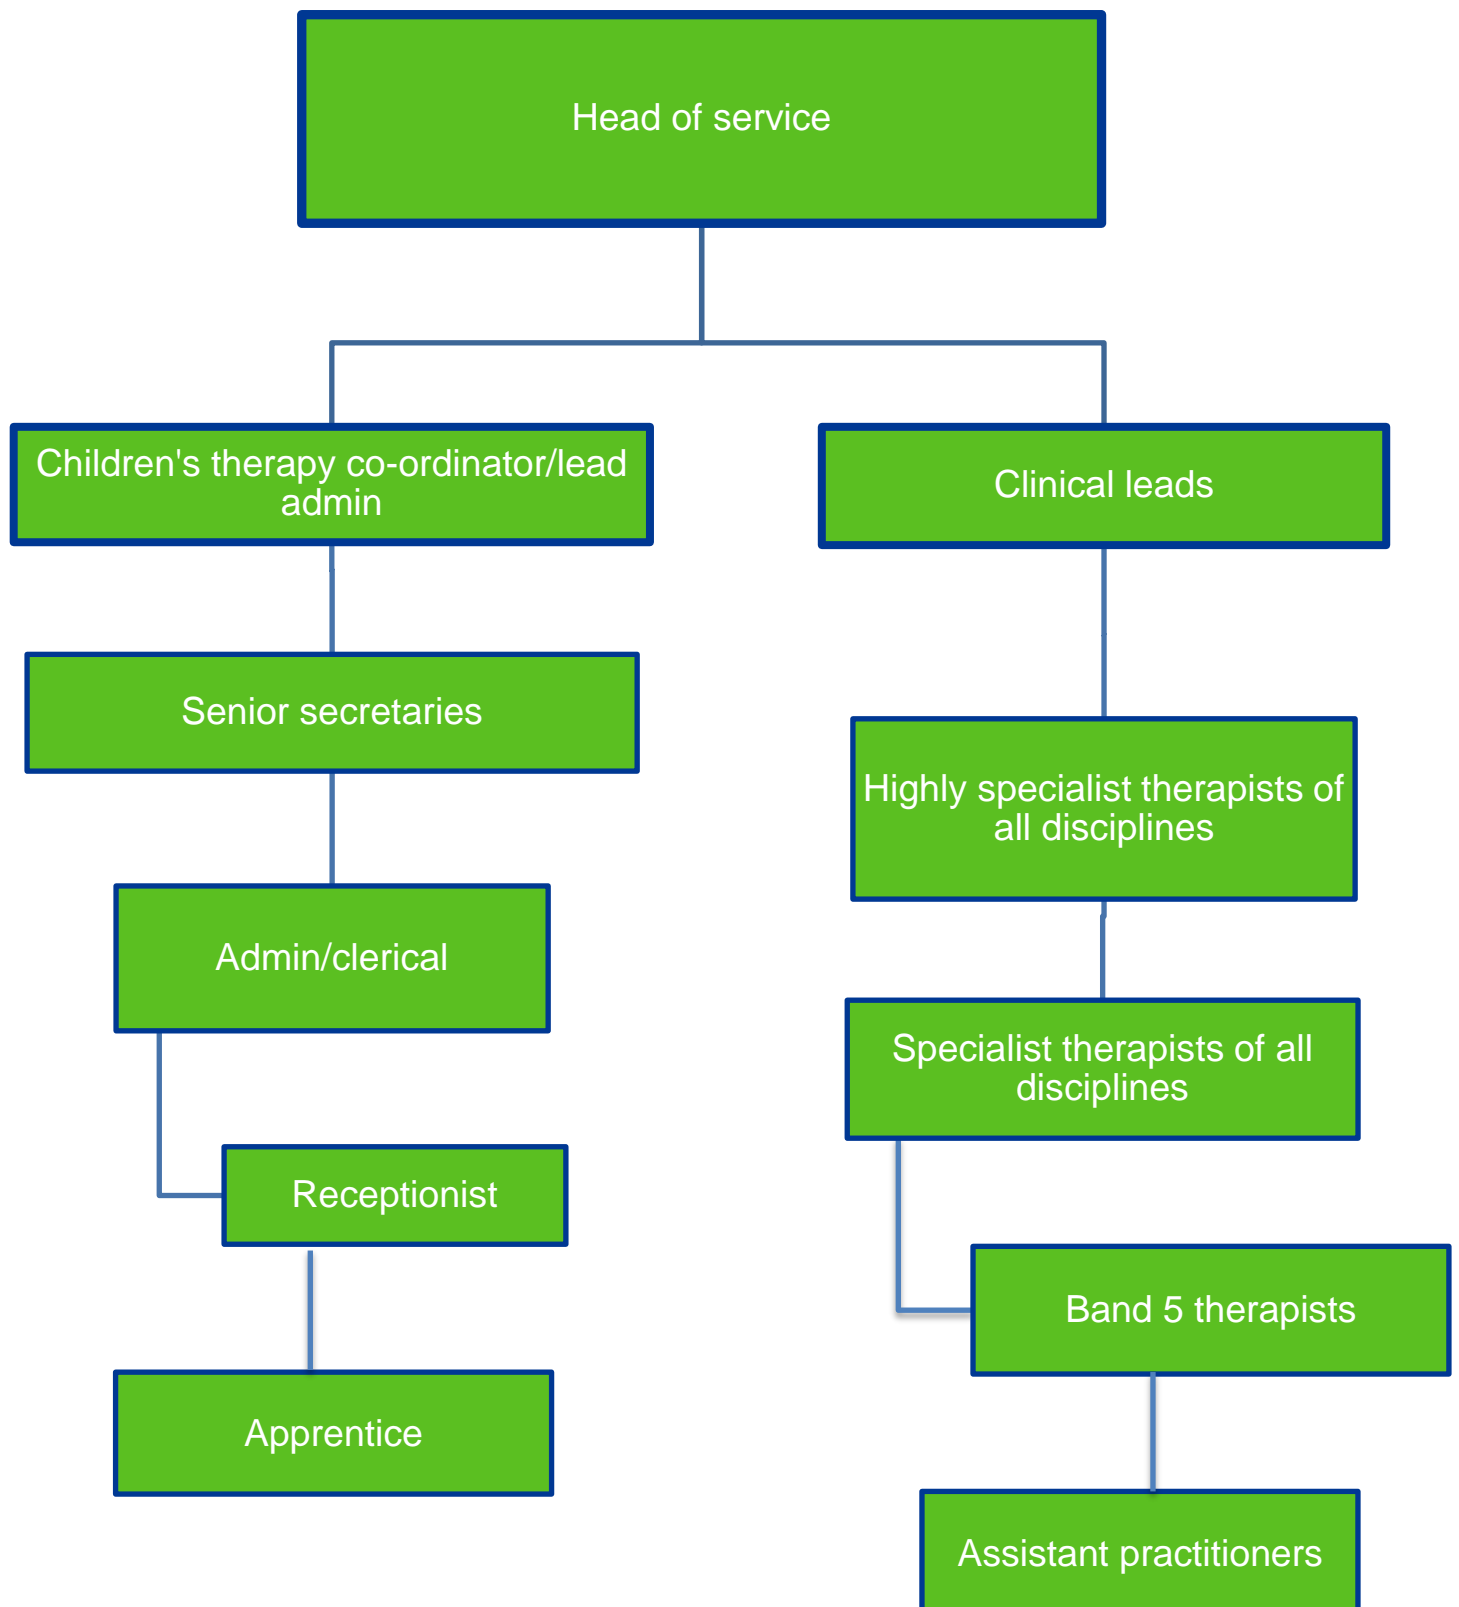

Staff are based in two main sites in Sittingbourne and Rochester but provide therapy services in clinics, schools, nurseries, children's centres and families' own homes. The service is subdivided into smaller multi-professional teams but we come together for specific projects and regular team days.

There are good opportunities for learning and development both within the team and externally. Career development is encouraged and you will have strong support to achieve your relevant professional competencies. Within our team, services are provided to both NHS commissioned work and services purchased directly by schools (traded).

Early Years, pooled budget, schools team, swale team, MSK and podiatry team

# Who are we?

## What our patients say

Brilliant communication between adult and child and also with myself. I was very pleased.

Brilliant service

All staff are extremely helpful and friendly.

My daughter really enjoys her therapy and they are all lovely people.

The service provides ideas and activities that help parents to encourage their children.

Everything was explained very clearly to me and my child. The centre is very well maintained and clean. All staff are extremely helpful and friendly.

I feel like I'm listened to

Therapist was so good with my daughter; she has really helped her and helped her confidence talking.

Really happy with the service, lots of understanding and support.

**98% of patients would recommend us to family and friends**
