

As a team we are seeking proactive, motivated registered nurses who are keen team players that strive to provide high quality patient care supported by a structured educational development plan. We embrace innovative thinking as we aim to deliver excellence in customer care, staff satisfaction and patient experience. CQC Rated in 2017 as Good through all domains.

Our local and regional surgical specialties consist of upper and lower GI which includes a specialist intestinal failure unit supporting complex nutritional needs for specific patient groups. Hepatobiliary and urology including a newly developing urology day unit which will transform patient pathways. Head & neck including head & neck acute assessment area and emergency surgery admissions consisting of our surgery emergency department (ASU) and acute admissions short stay (ASA). All patients are supported by an MDT approach ensuring timely reviews aiming to ensure patients within our care know their treatment pathways and likely discharge dates.
