

Would you like to be part of a dynamic and forward thinking team that actively encourages and supports professional and service development, within a Trust that has been rated as Outstanding three times? If so, look no further!

Due to additional funding we are excited to be able to recruit an Occupational Therapist into The Luton and Bedfordshire Community Eating Disorder Services (CEDS), who will play a pivotal role in establishing the OT provision within the Intensive Community Support Team and the Avoidant Restrictive Food Intake Disorder Pathway. We are seeking an experienced Band 7 OT who is enthusiastic about working within eating disorders and mental health, can demonstrate sound clinical and leadership skills and would like the opportunity to develop services. We would require you to have the ability to work autonomously as well as part of a team, to have good workload management skills and a compassionate approach towards service users and staff.

The post is based in Mountbatten House in Dunstable, and will require close integrated working with the multi-disciplinary team to provide high quality OT provision. We strive to provide services that are person-centred and recovery focused, based on the Model of Human Occupation and utilising Sensory Integration skills.

The post holder will be required to travel to see service users across Bedfordshire and Luton and also in the home environment.

You will be a key part of both the CEDS and OT services. Regular managerial and professional supervision will be provided and we also provide monthly opportunities to participate in OT Service-wide CPD events. Professional development and external training are actively encouraged through the appraisal process, and we also offer specialist training opportunities and a Band 7 Support and Development programme.
